

Partnering With Your District

Included with your VNG licenses

At The Visual Non-Glossary, our commitment to your district doesn't end with the purchase of licenses—we're here to support schools and teachers throughout the entire school year to enhance language acquisition and content comprehension for all students. **Our implementation support specialists are educational leaders** who understand challenges from the classroom to central office. **Partnering with the VNG means you will have a relationship** with an implementation support specialist who can share resources, data analysis, and expert guidance. This support will include:

- Meeting with district and school leaders to **brainstorm strategies** to support implementation
- **Modelling effective instruction** with the VNG and effective coaching for district and school leaders
- Checking in regularly about your district's implementation goals
- Providing **teacher usage** insight reports
- **Troubleshooting** technical issues
- **Highlighting free resources** from the VNG and elsewhere, including free PD resources, that might support your district's specific needs

Additional professional development

Constructed Learning is renowned as the leader in providing engaging, transformative professional development. Your Constructed Learning partner can provide:

- 45-, 60-, or 90-minute introductory training
- 3-hour deep-dive
- 6-hour (full-day) introduction and deep-dive
- After-school training (virtual only)

We also support teachers and leaders throughout the school year through instructional coaching and on-site school leadership rounds. Click [here](#) for more information.
