

The Visual Non-Glossary

Every VNG visual comes with three tiered, open-ended questions that can be used to assess student mastery of the vocabulary concept.

inferential

Asks students to make an inference or generate a response to a related hypothetical situation

What would **sedimentary rocks** look like if **cementation** did not occur?

*If **cementation** did not occur, then **sedimentary rocks** would...*

EVALUATION

SYNTHESIS

relational

Asks students to make a connection to another vocabulary term

How is **cementation** different from **compaction**?

***Cementation** is different from **compaction** because...*

ANALYSIS

APPLICATION

observational

This question is an excellent instruction to the concept. Can be answered by simply carefully observing the structured visual.

What occurs during the process of **cementation**?

*During the process of **cementation**, ...*

COMPREHENSION

KNOWLEDGE

Every question can be answered with a structured conversation strategy such as QSSSA
